You'd think  
**Dicalite 7**  
FILTER POWDER  
was twins!  
— because it does two jobs at the same time!

#### 1. Filters cleaning solvent clear and bright.

#### 2. Chases STATIC right out of the washer.

And when static goes, so do its dirty little friends — Dusting, Linting, Grayed Whites, Dulled Color.

Dicalite 7 is a pure diatomite-base filter powder, specially treated by an exclusive Dicalite process to make the cleaning solvent electrically conductive. Static drains off harmlessly — never gets a chance to build up and cause you the troubles you know it brings.

Dicalite 7 does a wonderful job of solvent filtration, too . . . works well in charged system cleaning, either one bath or separate rinse method, and *never cuts the charge!*

Use Dicalite 7, and you'll have fewer headaches in your drycleaning. That's fact — quality cleaners all across the country have written and told us so!

DICALITE DEPARTMENT, Great Lakes Carbon Corporation, 612 So. Flower St., L.A. 17, Calif.
